EDUCATION

PARUL UNIVERSITY

COMPUTER SCIENCE AND ENGG. B. TECH

CGPA: 8.6

2022 - 2026

Waghodia, Gujrat, India

AMBE SCHOOL

HIGHER SECONDARY CERTIFICATE (HSC)

Percentage: 67.5%

2021 - 2022

Vadodara, Gujrat, India

AMBE SCHOOL

SECONDARY SCHOOL CERTIFICATE (SSC)

Percentage: 76.5%

2019 - 2020

Vadodara, Gujrat, India

SKILLS

PROGRAMMING LANGUAGES

JavaScript, Python, Java, C

LIBRARIES/Frameworks

Node.js, Express.js, React.js, Socket.IO, GSAP, Tailwind CSS, Framer Motion, Shadcn, FastAPI

TOOLS / PLATFORMS

Git, Github, Figma, Motion

DATABASES

MongoDB, MySQL

PROJECTS / OPEN-SOURCE

TABULAR | [LINK](#)

EJS, Express, FastAPI, HTML

Tabular is a *DSA-powered timetable generator* that creates conflict-free weekly schedules for multiple divisions, subjects, teachers, and rooms. Built using a **FastAPI microservice** integrated with a **Node.js + Express.js** backend and **EJS frontend**, it supports both *JSON* and *Excel* inputs, handles limited classroom availability, and ensures no overlapping sessions. Designed as the core engine for a larger automatic timetable system.

SYNAPSE.IO | [LINK](#)

Node.js, Express.js, React.js, Socket.IO

Developing a *web application* to **streamline productivity** by aggregating updates from platforms like Gmail, LinkedIn, Twitter, and Reddit into a **single interface**. Users can **link accounts**, **organize feeds**, and **create collaborative groups**, helping reduce distractions and save time.

Built with *React.js* in Frontend, *Express.js* and *Node.js* in Backend, *MongoDB* for Database, and styled using *Tailwind CSS* with *Shadcn* components. Integrated with *Firebase* and *SocketIO* for real-time features and *JWT* and *OAuth* for secure authentication.

Currently in development, with expected completion in 2 months.

CHESSMASTER | [LINK](#)

JavaScript, Express, TailwindCSS

Developed a functional chess webapp featuring realtime **2-player game** remotely using **SocketIO**.

Built with **EJS** for the Frontend and **Express.js** and **Socket.IO** for the Backend and real-time updating, this project served as a foundational step in Backend development and understanding Web Sockets.

CERTIFICATIONS

- Computer Networks And Internet Protocol - NPTEL

- Theory of Computation - **NPTEL**
- AWS-Google Certificate - **GDSC KIIT**

PROFESSIONAL SUMMARY

Dedicated and passionate B.Tech Computer Engineering student at Parul University with a strong enthusiasm for programming and web development. Proficient in JavaScript and its vast ecosystem, including frameworks like Express, Mongoose, Node.js, React.js, and GSAP, for both back-end and front-end development. Also skilled in languages such as C, Java, and Python, with a solid understanding of programming fundamentals. Highly focused on leveraging technical expertise to contribute to impactful and dynamic projects.

PROJECTS

SYNAPSE.IO | [Link](#)

JavaScript, Express, React, MongoDB, TailwindCSS, Firebase

Developing a web application designed to streamline productivity by aggregating updates from multiple platforms such as Gmail, LinkedIn, Twitter, and Reddit into a single interface. The app enables users to link accounts, organize feeds, and create collaborative groups, reducing distractions and saving time. Built using React.js for the front-end, Tailwind CSS and Flowbite for styling, Express.js for the back-end, and MongoDB for the database. Integrated with Firebase for real-time features and JWT for secure user authentication. Currently in development, with expected completion in 45 months.

CHESSMASTER | [Link](#)

JavaScript, Express, TailwindCSS

Developed a functional chess application featuring both 2-player and computer-vs-player modes. Built with JavaScript for the front end and Express.js for the back end, this project served as a foundational step in full-stack development.

SHOPEASE | [Link](#)

JavaScript, Express, React, MongoDB, TailwindCSS, Firebase

Created a dynamic e-commerce website inspired by platforms like Amazon, featuring user authentication, item browsing, and a functional cart system. Built using React.js, Express.js, and MongoDB, with plans to integrate a payment gateway in future iterations. This project showcases foundational e-commerce functionalities
